Submitted (15-APR-2002) Maize Mapping Project, University of Missouri, Columbia, MO 65211, USA
If you are interested in getting corresponding physical clones, these are publicly available from ZmDB and may be found by BLAST searching at MSL, maizemap.org; ZmDB, www.zmdb.iastate.edu; TIGR, www.ibgr.org, or NCBI, www.ncbi.nlm.nih.gov. When the source of the schez CpNA sequences is either Virginia Malbot, Stanford or Pat Schnable, Iowa State, then clones may be requested from ZmDB:
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             GGTACACCTAACTCGAGAAGAATCCGTTGTATGAATCCCAACTACACAGTTTCAAGTTC 1031

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     The sequences are based on single pass reads.

Life Technologies (a division of Invitrogen) members carried out full-length librairies construction: Temple G.

Genoscope members carried out sequencing and annotation: Castell V., Aury J.M., Jaillon O., Wincker P., Menard M., Cruaud C., Schachter V., Weissenbach J., Salanoubat M.

Mord IRRA: Clepet C., Caboche M.

Annotation is based on the June 2003 version of the Arabidopsis genome released by MIPS (Munich Information center for Protein Sequences). 5 prime and 3 prime are assembled with Phrap.

Oryza sativa (indica cultivar-group)
Oryza sativa (indica cultivar-group)

Bukaryota; Viridiplantae; Streptophyta; Embryophyta; Tracheophyta;
Spermatophyta; Magnoliophyta; Liliopsida; Poales; Poaceae;
Ehrhartoideae; Oryzeae; Oryza.

1 (bases 1 to 2295)
SMA,L., Wango,J., Chen,C., Liu,X., Su,N., Li,L., Wang,X., Cao,M., Jao,Y., Sun,N., Zhang,X., Bao,J., Sun,D., Zhao,H., Yuan,L., Wong,G.K.S., Deng,X.W. and Wang,J.
An analysis of transcriptional regulation of the rice genome and its comparison to Arabidopsis

// Site_1: EcoRI; Site_2: XhoI; Plants were grown in the greenhouse at University of California, Riverside. The scion was a open-pollinate of Very probably selfed)
seedling of Poncirus trifoliata cv Pomeroy that was selected as homozygous for the Ctv resistance gene. The roctstock was sweet orange infected with citrus tristera virus (CTV) isolate T514 over 1 year before sampling (CTV infects sweet orange, but not genotypes carrying the Ctv resistance gene. Shoots 10-30 cm long were harvested in October 2000, and the green phicoem (bark) was removed and frozen quickly in dry ice. Total RNA was extracted using Trizol reagent (Gibco). Poly(A) RNA was purified, a cDNA library was made, and 0.5 million primary lambda cDNA clones were in vivo excised to give a population of pellors were in vivo excised to give a population of performed in the ML Roose lab at the University of California Riverside by X. Ye. Phagemids were plated, plasmid DNA purified, cDNA clones archived, and DNA sequences determined bi-directionally using an ABI3730 at the University of California Riverside Genomics Institute, Chromatogram files were transmitted to UC Riverside (by Chromatogram files were transmitted (by Wanamsker) using the Harv&ST pipeline (http://harvest.ucr.edu) to remove vector and cloning oligo sequences and various contaminants, and to trim to a high quality region. Sequences that retained a phred 17 region of at least 100 bases were deposited to GenBank."

```

6hr, 12hr, 1d, 2d, and 4d; roots:2hr, 6hr, 12hr, and 2d). Set 2 were grown under the standard conditions and then were water stressed by withdrawal of further watering applications. Drought stressed plants were harvested after cessation of watering (leaves: 3d, 5d, and 7d; roots:3d and 5d). Set 3 were grown under the standard conditions and then were cold stressed at 2 hr, 6 hr, 12 hr, 1 d, and 4d and roots were harvested at 2 hr, 6 hr, 12 hr, 1 d, 2d. Set 4 were grown under the standard conditions and then were near stressed at 2 hr, 6 hr, 12 hr, 1 d, 2d. Set 4 were grown under the standard conditions and then were heat stressed by placement at 35 C. Heat stressed leaves were harvested at 2 hr, 6 hr, 12 hr, 1 d, 2d and 4d and heat-stressed roots were harvested at 6 hr, 12 hr, 1 d, and 4d. RAM was isolated from all tissues and equal RNA from each tissue and stress was pooled to construct the CDNA library. RNA sample."

This clone sequence is one of 5,000 Ceres full-length cDNAs made available to TIGR and Genbank. The following quality assessment of this set was done by comparison with known proteins: two percent of this set was done by comparison with known proteins: two percent of the clones are estimated to be 5'-truncated; less than one percent are 3'-truncated; approximately two percent represent alternative splice variants, including unspliced introns and spliced exons; one percent may contain premature stop codons; five percent may have frame shifts in a coding region. A sequence is considered to be 5'-truncated if it lacks the translation initiation start (ATG). A sequence is considered to be 3'-truncated if it lacks the considered to be 5'-truncated if it lacks the sequence is considered to be 3'-truncated if it lacks the general polymorphisms when compared to sequences from Col-0. Genset carried out the library production and sequences from Col-0. Genset carried out the library production and sequences from fine it location of clones, and sequence assembly. /translation="MYSIPLGPPQPPSLAPQPPHLHGGDSLKRRPDIDNDKEMSAAVI EGNDAVTGHIISTTIGGKNGEPKQTISYMAERVVGTGSFGIVFQAKCLETGESVAIKK VLODRRYKNRELQLMRLMDHPNVOSLHGFPSTTRRBLFLALLWMEYVPETLYRVLKH YTGSNQRMPIPYKLYTYGIPGLAY HTAPGVCHRDVKPQNLLVDPLTHQCKLCDFG SAKVLVNGRANISYTCSRYYRSPELIFGAFEYTSSIDIMSAGCVLABELLIGOPLFPGE NSVDRLVEIIKVLGTPTREBIRCMNPYTDFRFPQIKAHPWHKVFHKRMPPEAIDLAS RLLQYSPSLRCTALEACAHPFFNELREPNARLPNGRPLPPLFNGE 1450 AGGCGATGATTGTGTCCTATTATATTCTTTTGTTCACTGACTTGTAGAGAGATACTTTT 1509 PLN 14-APR-2003 Eukaryophyta; Iracheophyta; Embryophyta; Tracheophyta; Spermatophyta; Magnoliophyta; eudicotyledons; core eudicots; rosids; eurosids II; Brassicales; Brassicaceae; Arabidopsis. The RIKEN Genomic Sciences Center (GSC) members carried out the collection and clustering of RAFL cDNAs (RAFL cDNA: 'RIKEN Arabidopsis Pull-Length cDNA'): Seki,M., Narusaka,M., Ishida,J., Satu,M., Kamiya,A., Sakurai,T., Carninci,P., Kawai, J., Hayashizaki,Y. and Shinozaki,K. The Salk, Stanford, PGEC (SSP) Consortium members constructed and sequenced the pUNI (ORF) clones using the RAFL cDNAs: Yamada, K., Liu, S.X., Pham, P.K., Banh, J., Banno, F., Dale, J.M., Goldsmith, A.D., Jiang, P.X., Lee, J.M., Onodera, C.S., Quach, H.L., Tang, C.C., Yamada, K.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           Š
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      ઠ
                                                                                                                                                                                                                                                                                                                                  Direct Submission

Submitted (11-MAR-2002) Ceres, Inc, 3007 Malibu Canyon Road, Malibu, CA 90265, USA

This clone sequence is one of 5,000 Ceres full-length cDNAs made available to TIGR and Genbank. The following quality assessment of this set was done by comparison with known proteins: two percent of the clones are estimated to be 5-truncated; less than one percent are 3-truncated; approximately two percent represent alternative splice variants, including unspliced introns and spliced exons; one percent may contain premature stop codons; five percent may have frame shifts in a coding region. A sequence is considered to be 5'-truncated if it lacks the translation initiation start (ATG). A sequence is considered to be 3'-truncated if it lacks the cereminal end of the encoded protein. Please note that these cDNA sequences are derived from the Ws or Lack copyes and therefore may contain polymorphisms when compared to sequences from Col-0. Genset carried out the library production and sequences from Col-0. Genset carried out the library production and sequenceing of the location/Qualifiers
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     /translation="vaddkempaavvdchdqvtghiisttiggkngepkqtisymaer
